

How to Download Products Directly to a Mobile Device

Upon purchasing an Instant Download product from the Rabbi Daniel Lapin store, you will receive two emails – a payment transaction confirmation, and an order confirmation. The download link will be in the order confirmation email. Please check your spam folder, as these emails sometimes get filtered by security settings on receiver's computer.

We strongly recommend downloading the zipped folder to a computer first, extract the files and then transfer to your mobile device (iPhone, iPad, Android phone/Tablet). Please see our other instruction sheets for download steps for specific operating systems.

However, if you don't have a computer, it is still possible to download directly to a mobile device. For this to work, you will need a third-party app that can handle downloading and extracting zipped files. There are many available apps that can handle unzipping compressed files, and technology is constantly changing, so it is best to choose an app that works with your mobile device.

We have listed a few apps below, but you should make sure it is compatible with your device and download one that you feel comfortable with. Once you download and extract the MP3 files, they should play in your device's media player.

iPhone/iPads

Zip Viewer for iPhone: ([Get it on iTunes](#)) ([How to Use](#))

WinZip for iOS: ([Get it on iTunes](#)) ([How to Use](#))

Android Phone/Tablets

ZArchiver ([Get it in Play Store](#)) ([How to Use](#))

WinZip for Android ([Get it in Play Store](#)) ([How to Use](#))
